I'm trying to put a cd into the iPad 2 to play a track but the slot underneath the screen won't allow me. What can I do?

iPad 2, iOS 4.3.1

OSX

The Shrouded World Desktop

<http://lifehacker.com/the-shrouded-world-desktop-1788300537>

Reader [Alec](#) submitted this desktop to our [Desktop Showcase](#), and aside from a stunning wallpaper, it's a neatly customized Mac. Here's how he set everything up.

iOS 10!

Apple releases iOS 10.2 w/ new emoji, Messages effects, US-only TV app, wallpapers, more by Apolozac

<https://9to5mac.com/2016/12/12/ios-10-2-now-available/>

Apple has released iOS 10.2 for iPhone, iPad, and iPod touch. iOS 10.2 includes several new features like Unicode 9.0 emoji, three new iPhone 7 and iPhone 7 Plus wallpapers, a new TV app, additional camera features, new Messages screen effects, and more.

These are the changes discovered during iOS 10.2 beta:

- Three [new wallpapers](#) in iOS 10.2 beta (only for iPhone 7 and iPhone 7 Plus)
- New widget for Videos app
- New Preserve Camera setting
- New emoji (looks like [Unicode 9.0 update](#)/also on macOS 10.12.2, watchOS 3.1.1)
- New 'Press and Hold to Speak' menu under Home Button Accessibility settings
- New 'Celebration' Messages screen effect
- New 'Show Star Ratings' option under Music Settings
- New headphone icon in status bar for Bluetooth audio devices (previously seen with the [Beats Solo3](#))
- TV app now included on iOS 10.2 beta, Videos app still present
- TV widget joins Videos widget
- SOS feature similar to Apple Watch when clicking power button 5x (which may be a [requirement](#) in India next year)
- Music now points to relocated shuffle and repeat controls (which have a button look now)
- TV app totally replaces Videos app on beta 3
- Feedback app returns in beta 3
- Previously seen SOS feature now only available in India ([due to upcoming requirement](#))
- New 'Love' screen effect joins 'Celebration' in Messages

TSMC looks beyond iPhone 8's 10nm chips as it plans new plant to make 5nm and 3nm ones by Ben Lovejoy

<https://9to5mac.com/2016/12/08/tsmc-iphone-8-iphone-9-10nm-5nm-3nm-chips/>

TSMC may have won the exclusive contract to produce the [A10 chip](#) in the iPhone 7 and be on track to do the same for the [A11 chip](#) for next year's iPhone, but the company isn't taking future business for granted. [Nikkei Asian Review](#) reports that the company is already planning to build a new plant to create 5nm and 3nm chips to help win future Apple business ...

The A11 chip in next year's iPhone will use a 10nm process, already a big advance on the 16nm chip used in the iPhone 7. The design for this was said to have [been finalized](#) back in May, though TSMC won't be in a position to deliver the first samples to Apple until the first quarter of next year.

How to Transfer Photos from iPhone to iPhone by Conner Carey

<http://www.iphonelife.com/content/how-to-transfer-photos-iphone-to-iphone>

Thanks to AirDrop, transferring photos from iPhone to iPhone is incredibly easy. In fact, most other articles I found on the web for transferring pictures between devices made the whole process a lot harder than it actually is. This isn't a tip on setting up your new iPhone 7—you can learn everything you need to know about setting up a new iPhone [here](#). This is how to simply and easily transfer photos from iPhone to iPhone. Whether this is your older iPhone to your new iPhone or you're with a friend and you want to send them the photo you just took together, you can use this tip and AirDrop to send pictures from iPhone to iPhone in seconds. Here's how to transfer photos from iPhone to iPhone.

Apple Maps now plots out EV stations to help keep your Tesla charged by Eric Beaudoin

<https://www.airsassociation.org/services-new/airs-knowledge-network-n/airs-articles/item/17234-apple-maps-now-plots-out-ev-stations-to-help-keep-your-tesla-charged>

Apple Maps is picking up an invaluable integration for electric vehicle drivers: ChargePoint integration.

While electric cars are slowly working their way towards affordability, [Apple Maps](#) is giving the EV owners a helping hand with the integration of ChargePoint's stations. [ChargePoint](#) offers more than 30,000 charging stations around the world, and the integration into Apple Maps is literally putting them on the map with EV charging station badges. Apple Maps users can tap one of those icons for directions and station info like hours of operation and pricing (with Apple Pay support), or ask Siri "where's the closest charging station?" for directions.
